PUBLIC DOMAIN & SHAREWARE

1990 CATALOGUE SUPPLEMENT 463 THEME DISKS AND MORE TO COME

We are pleased to present this Supplement to our current Public Domain & Shareware Catalogue. Many hours have been spent carefully searching through Atari 8-bit libraries around the World to bring you the very best of the available offerings. Each and every program listed has been tested and is GUARANTEED to run on your system or we will replace it for free. You can't lose with BELLCOM!

Unlike other supplier's listings, our large catalogues contain clear descriptions of each program so you know exactly what you are getting. Take a moment now and order the disks that interest you. You'll be glad you did.

Remember, this Supplement only contains the latest Theme Disks to be added to the BELLCOM library. All the rest are clearly listed in our current 31 page yellow catalogue. So, if you don't have your own personal copy of the BELLCOM Public Domain & Shareware Catalogue, simply write to us and we'll rush a complimentary copy to you.

THE NEW 1991 BELLCOM CATALOGUE

Looking for new products for your Atari 800-XL-XE-XEGS?

You won't want to miss out on what BELLCOM has in store for you! Every week we receive new submissions of Public Domain and Shareware in the mail. It's exciting, and it indicates that the Atari 8-bit computer is far from dead. In fact, our supply of top-notch Public Domain & Shareware for the 8-bit Atari is showing no signs of slowing down. We know where to find it and for as long as you want it, BELLCOM will continue to bring you the best. That is why we are starting now to prepare the new 1991 BELLCOM Catalogue for release early next year.

The new BELLCOM catalogue will be our BIGGEST yet. Not only will it list and describe many exciting new Public Domain & Shareware programs as well as our huge current collection, but in answer to many requests we also plan to offer you mail order sources for those great 8-bit commercial products from the past that you are having trouble finding now. Plus, we will list the new commercial releases. New 8-bit releases?? Sure, but like I said before, you have to know where to find them. BELLCOM does, and we'll share it all with you. Believe me, this will be unlike any other 8-bit Catalogue you've seen. Something new and different. A treasure trove of XLXE products. You'll want to get your copy when it's available.

Unfortunately, not everyone will receive it. As our Catalogue keeps growing our expenses increase too. Because of rising printing and postage costs we are forced to drastically trim our mailing list to include only those who are current BELLCOM customers. To remain on our list and to keep informed of all the resources available for your Atari, we simply must receive an order from you. Many of you have already ordered from us this year and we're most grateful for your support. However, we have not heard from some of you since we mailed you your Catalogue last year. Please, we don't want to miss you when we announce our huge new catalogue. **Place your order now while there's still time.**

QUESTIONS PEOPLE ASK

Does BELLCOM have a BBS from which programs can be obtained?

Sorry, but we just don't have the time to properly maintain a BBS. Also, as I'm sure you already realize, it actually works out much cheaper to obtain Theme Disks by mail than to pay expensive long distance phone charges to download them.

Can our User Group distribute BELLCOM Theme Disks to its members?

Yes, by all means. Although our disk compilations are copyrighted to prevent the commercial distribution of BELLCOM Theme Disks by other firms and individuals, non-profit Atari User Groups are encouraged to make disk copies for their membership. In fact, a number of Atari clubs are now using BELLCOM Theme Disks for their Disk-of-the-Month selection. Club members can simply submit their disk requests to the club librarian and the 2 or 3 most requested

selections can be ordered for the next meeting. This saves busy club librarians oodles of time as we do all the work. BELLCOM disks are guaranteed and come ready to run. Remember, we're here to serve your User Group as well as individual Atari users.

Why doesn't BELLCOM list programs from ANTIC and Compute?

Many users assume that all programs published in magazines are in the Public Domain. Such is not the case. Some publications copyright each and every program they publish, including their monthly disk compilations. We may not like their policy, but we must respect it, as software piracy ultimately hurts us all.

Do you have an Atari ST catalogue?

Sorry, but we don't support the ST even though we have one and it's a great computer. You see, BELLCOM

specializes in 8-bit software only. We know the XLXE inside out, it's still our favourite computer, and only by concentrating 100% of our efforts on it exclusively are we able to give you the best quality product and service.

If it hadn't been for a friend, I wouldn't have heard about your service. Why don't you advertise more?

We'd love to advertise more, but it's very expensive. Especially when the Atari 8-bit market isn't as large as it used to be. Our best advertising is by word of mouth from satisfied customers. We receive many appreciative comments like those of William Wood of Brandon, Manitoba, who writes "...to congratulate you on your service and your products. I find your assistance outstanding and you may quote me at any time". Please, spread the word about BELLCOM to your friends and help us to continue supporting your Atari 8-bit computer. We need you and you need us!

Software listed in the BELLCOM catalogue has been selected from various Public Domain sources throughout the world and it is all believed to be in the Public Domain, or offered as Shareware. Anyone finding a program listed that is not Public Domain or Shareware, please let us know so that we may remove it. BELLCOM does not support or condone software piracy!

There is no charge for the Public Domain Software itself. The modest fee charged for each disk is to defray our considerable time and expense involved in collecting, testing, advertising, and distributing the software. All software we provide is guaranteed to load and run or it will be replaced for free. Simply return the defective disk with a note describing the problem and a replacement disk will be shipped to you. Please read the complete BELLCOM Sales Policy in our BELLCOM PUBLIC DOMAIN & SHAREWARE CATALOGUE prior to ordering.

UTILITIES

■ 344 MEC*DOS 1.0

Although not compatible with any other Atari DOS, this application is interesting to try. MEC*DOS operates much like MS-DOS for IBM computers and allows for similar features. Shareware by Marc Davis (DOC)(BAS)

■ 345 SUPER ARCS

Looking for archivers??

SUPER ARC 2.0 and SUPER UN-ARC 2.1 are compatible with all DOS's, including SpartaDOS, and are the best archivers/un-archivers available. SUPER ARC quickly compacts files as much as 30% and includes password encrypt and other features. SUPER UN-ARC is compatible with All Crunch files and squashed files created with PKPAK utility for the PC. Shareware by Bob Puff. (DOC)(ML)

DISKCOMM 3.2 will easily compact an entire disk, using any density, and turn it into one or more files, then turn file(s) back into a disk. Shareware by Bob Puff. (DOC)(ML)

■ 346 SPARTA UTILITIES #6

Public Domain version of Toolkit for SpartaDOS users, with full documentation.

DCOPY - SpartaDOS DCOPY version makes DOS commands much easier! Menu driven to assist in copying, deleting, and locking files, etc. View ARC file contents, append files, sort SpartaDOS directories and more. (ML)

CHANGESUB - Easily rename sub directories and filenames. (ML)

DSWAP - Duplicates Swap function on MIO menu via DOS command. (ML)

RECOVER - Recovers lost entries.

(ML)

SORTIT - Sorts directories. (ML)
VPATH - Provides alternative command line for SpartaDOS users. (ML)
SPEEDUS - Menu which quick loads binary files. Allows filenames of any length, disables Basic, creates menu headlines, supports US Doubler. (ML)

■ 347 SPARTA UTILITIES #7

Utilities selected to enhance your use of SpartaDOS.

BEDIT 1.5 - Unique file editor that allows program or data files (even machine language files) to be modified. Many features. (ML)

MFORMAT - Multiple disk formatting in DOS 2.5 SID. (ML)

FORMAT - Format S/D, D/D, 1050D, and UltraSpeed Skew in DOS 2.5. (ML)

MOVE - Moves file entries from one directory to another without creating duplicate files. (ML)

RD1088 - Format 1024K RAMdisk on 130XE with 1 Meg upgrade. (ML)

REPAIR - LIST unlistable Basic programs and run corrupted Basic programs. (ML)

WATCH - Installs disk watcher display handler. (ML)

■ 348 SPARTA UTILITIES #8

Utilities selected to enhance your use of SpartaDOS, including several for HAPPY 1050 owners, with full documentation.

HAPPY MENU - Does all your Happy 1050 set calls, then exits to DOS. (ML)

SETHAPPY - Sets Happy drives to buffered fast write to work with SpartaDOS. (ML)

USHAPPY - COM file will turn on USPD on Happy drives under Sparta-

DOS 3.2. (ML)

USHAPPY1 - As above, but for 1 Happy 1050. (ML)

SPEED3US - Menu quick loads binary files. Allows filenames of any length, disables Basic, creates menu headlines, supports US Doubler. (ML)

HAPPYOS - Installs Happy Warp Speed routines into XL/IXE operating system using no memory. Now use any DOS in Warp Speed. (ML)

SPAINDEX - Professionally organizes your disk library. (ML)

ALFCRUNCH 1.4 - The amazing archiver program. Lightning fast and more reliable than ARC. Now with time/date support for SpartaDOS 3.2 users. (ML)

■ 349 SPARTA UTILITIES #9

Utilities selected to enhance your use of SpartaDOS.

SUPER UN-ARC 1.0 - Un-crunches most ARC compactations and is compatible with All Crunch files. Shareware by Bob Puff. (DOC)(ML)

DISK COMMUNICATOR 3.2 - Easily compact an entire disk, using any density, and turn it into one or more files, then turn file(s) back into a disk. (ML)

FILEFIX2 - Remove duplicate blocks of information from downloaded files. (ML)

XF551 PATCH - Alters SpartaDOS 3.2 disks to enable high speed SIO on an XF551 drive. (BAS)

■ 386 SUPER COPYMATE XE

This version of CopyMate for the 130XE upgraded to 576k, copies any configuration (single/double sided, single/double density) in only one pass, using up to 4 disk drives. (ML)(For a 576k 130XE only!)

TELECOMM & ELECTRONICS

■ 322 CENTEX 7.83

Atari Terminal program featuring Joystick input, auto log-on, macros, SPRINT & MCI code support, clock, on-line timer, adjustable screen display, on-line help menu, auto-dial/ redial, 300-1200 bps transfer, unlimited file capture, Xmodem transfer, and more.

DOUBLE-SIDED DISKS

■ D-62 BBS EXPRESS! 850

■ 321 BBS EXPRESS! DOCUMENTATION

Written in Action! by Keith Ledbetter, this is one of the most dependable and fastest BBS's for the Atari 8-bit. All usual BBS features, plus a unique message base structure that automatically compacts messages. You NEVER have to compact message bases! Supports most DOS's including SpartaDOS. Requires a Hayes

compatible modem and 850 interface. Documentation available on Theme Disk #321. Shareware by Orion MicroSystems.

■ D-63 BBS EXPRESS! 1030-XM301

Same as D-62, but configured for the Atari 1030/XM301 direct connect modems. Documentation available on Theme Disk #321. Shareware by Orion MicroSystems.

■ D-64 BobTerm 1.1

Many claim this to be the best full featured multi-tasking terminal package available for the Atari 800/XL/IXE. Features include an online/real-time clock, autodialing, floating buffer size, chat window recall, and much more. Supports XModem, XModem-CRC, 1k-XModem, CIS Fast Modem, YModem (BATCHE), and FModem protocols. Compatible with all known RS-232 interfaced modems and most

direct-connect modems, including the 835/1030/XM301, Supra/MPP 300, and newer SX212 modems. Allows baud rates of 300 to 19200 baud (great for transfer between machines). Tested with Atari DOS, MYDOS, TopDOS, SpartaDOS, and SpartaDOS X cartridge. Complete with Instructions. Shareware by Bob Puff.

■ D-65 OASIS BBS

Most likely the best BBS available for the Atari 800/XL/IXE computers, and its now in the Public Domain. OASIS lets you operate just like the big systems. Multi-featured, with E-mail, passwords, online movies, and much more. Supports Atari DOS and SpartaDOS. A Hayes compatible modem, interface, and printer are required. Comes with instructions and a Demo of the BBS in operation. Might be just what you're looking for to begin a fascinating new hobby!

HOME & BUSINESS

■ 288 XMM801 PRINT SHOP DRIVER

Atari XMM801 hi-res graphics dump compatibility fix for XLiXE computers by David Castell. Allows the XMM801 to work with many 48K programs that support Epson printers, such as Print Shop, Megalot, Typsetter 65, and even some Public Domain programs. If you're having problems with your XMM801, then this may be worth trying!

ATARI 8-BIT USER GROUPS

THEY'RE WORTH THEIR WEIGHT IN GOLD

BELLCOM's customers often write and ask for addresses of local Atari 8-bit user groups. In the following listing you will find some of the best user groups available. These groups all support the Atari 800-XL-XE-XEGS computers, and they all maintain 8-bit Public Domain libraries. Many clubs publish excellent monthly newsletters which are available through membership or by subscription at very reasonable cost. These newsletters contain interesting news items, product reviews, and tips on operating your Atari 8-bit computer. Also, Bulletin Board Systems (BBS) that can be accessed by 8-bit modem owners are maintained by some clubs. In this time of dwindling resources for Atari 8-bit owners, you would be well advised to join a local user group. It will add a new dimension to your hobby!

IMPORTANT: Feel free to write to any of the following user groups, but remember, user groups are not run for profit and have limited financial resources, so please include a dollar or two with your letter if you wish a reply. Also, if you request a sample newsletter, be sure to include a little extra. Your donation helps to pay for the cost of postage and printing.
